

ABOUT CRUX LX

Crux LX is a power-efficient and modular unified communication platform meeting needs of consumers and businesses through a single device, without requiring cables and instruments, at a fraction of a cost that customers currently pay for dated and fragmented technology.

New users, applications and services can be easily added to this platform. The scalable and modular design provides valuable investment protection. Crux LX is also positioned uniquely as an efficient mobile router and IP-PBX platform while on the move, as it can also run on a battery bank.

In addition, Crux LX serves as an open platform that supports third-party applications that use LAMP, node.js and MQTT stack, which is natively supported, making it not only a perfect fit for unified communication needs but also a suitable base for application integration.

"AS WIRELESS TECHNOLOGIES ARE CATCHING UP IN EVERY WALK OF LIFE, WITH EVERYONE CARRYING A MOBILE DEVICE, CRUX LABS HAS DEMONSTRATED A COST EFFECTIVE SOLUTION WHICH MAKES IT EASY FOR SMB'S TO SETUP A COMMUNICATION SYSTEM WITHOUT ANY INFRASTRUCTURE AND PEOPLE COSTS."

Ramesh Datla
Managing Director

"WHAT IMPRESSED US WAS THE EASE AND SIMPLICITY OF THIS COMPREHENSIVE ALL IN ONE DEVICE. IT BROUGHT TO THE FORE THE NEED FOR A SOLUTION WHICH WAS DO-IT-YOURSELF, DID NOT REQUIRE ANY ADDITIONAL INFRASTRUCTURE OR CABLING FOR IT'S SETUP AND IS COST EFFICIENT"

Samuel Hall
Program Director
