Intern (Full-stack Developer)

Description

Are you ready to be a part of a start-up team that is changing the way offices communicate globally?

Crux Labs, known for its innovative technology and philosophy of open source commercialization, seeks a self-directed **Technology Intern – Full-stack Developer** with a **passion for technology**, collaboration, and creative problem-solving. The intern will actively contribute to meaningful projects and work closely with a mentor and with senior leadership.

At Crux Labs, we follow a lean team structure. That means that we don't believe in having managers to mind people. Everyone is self-driven and know not only their jobs but also chime in to help in other areas that they may be familiar with or passionate about. Everyone, including the CEO, is completely hands-on on the job and can multi-hat responsibilities. You will be challenged at every step, hence, this is not one of those laid-back kind of internships.

At the end of your internship, you may be offered a job at Crux Labs, subject to openings and our assessment of your work during your internship with us. In any case, you will gain broad experience in marketing and this internship will prepare you to enter any fast paced work environment.

Key Responsibilities

- Support the Development and Support team in maintaining hardware, software, and other systems
- Assist with troubleshooting issues and provide technical support
- Organize and maintain IT assets and resources
